

S.P.A.R.C. TECHNOLOGIES

ROBOTIC SOLUTIONS

Bringing tomorrow's technology & innovation to today's workplace

S.P.A.R.C. Technologies specializes in cutting-edge robotics and advanced systems designed to elevate businesses to new heights.

By leveraging the power of next-generation robotics, S.P.A.R.C. Technologies transforms guest experiences and optimizes team support to meet today's essential demands. Since its founding in 2021, S.P.A.R.C. Technologies has established itself as a leader in deploying and maintaining robotic solutions. With a dedicated and experienced team, they ensure your business seamlessly integrates robotics to achieve success.

Serving businesses across Canada, S.P.A.R.C. Technologies empowers companies to reduce costs, boost efficiency, and bring their visions to life with customized programs and cutting-edge solutions.

VALUES

<p>Innovative We look to improve upon what exists to perform better every day.</p>	<p>Efficient Our technology exists to help you move faster with more precision.</p>
<p>Transparent Through honesty and truthfulness we can shape the future of robotics.</p>	<p>Approachable Connecting people through simple and inviting solutions.</p>

NEW TECH FOR FOOD SERVICE

S.P.A.R.C. Technologies offers robotic solutions for food service problems.

Benefits:

- Continuous operation levels during labour shortages; requires no rests or sick days

Increased Productivity:

- Service robots have a higher carrying capacity
- Able to serve multiple destinations in one trip, saving time, which leads to saved costs

CC1

Multi-Function Cleaning Robot

- Sweeps, scrubs, vacuums, mops
- Obstacle avoidance technology
- Charges, drains, and refills itself without employee involvement.
- Squared-off chassis allows cleaning into corners
- Intelligent lift control for cleaning areas with multiple levels

BELLABOT

Premium Delivery Robot

- Superior human-Robot interaction capabilities.
- 3D sensors and modular chassis allows obstacle avoidance and movement in any angle
- 40 kg capacity

FLASHBOT

Building Delivery Robot

- Elevator communication technology enables quick and efficient delivery to multiple floors within hotels, resorts, restaurants, offices
- UV light sterilization ensures clean delivery of all goods for room service delivery
- 30 kg capacity
